

METRO TANKS

URBAN WATER STORAGE

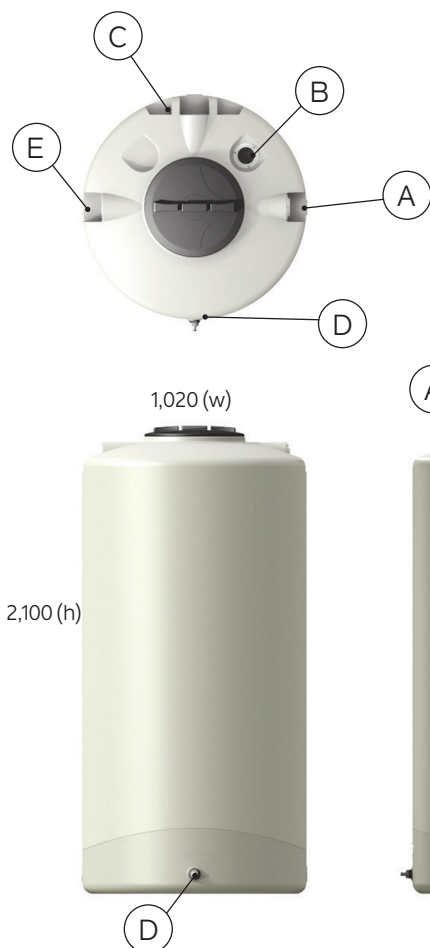

The completely modular, slim line rain harvesting solution.

by aliaxis

Rain Harvesting Tank Features

- Easy to maneuver and install.
- Slim line (space saving).
- Low cost per litre of storage.
- Maximum use of volume - each tank holds 1670 litres.
- Popular choices of colour to compliment your property.
- Manufactured from high quality, food grade virgin polyethylene.
- One-piece construction, UV stabilised.
- Designed and manufactured in New Zealand.

- A** Cut out areas at A for up to three over-flow connections 90mm diameter or less.
- B** Cut out areas at B for up to two down-pipe connections 90mm diameter or less.
- C** Formed double lugs with 20mm diameter holes at C for securing to wall (wall bracket supplied)
- D** Raised areas at D to suit single 15mm male/female threaded outlet (tank fitting supplied)
- E** Outlet Port (raised area) at E to suit single 44mm OD/25mm ID Uniseal for connecting to multiple tanks (hole saw supplied)

Completely Modular System

- Scalable from 1 unit to 3 units in different configurations.
- Linear or corner configuration.
- Standard 25mm connections supplied or up to 70mm.
- Quick and simple installation with full kit provided.
- Connect extra tanks to achieve any required volume.
- Vented and lockable 450mm lid.
